

Optical Metrology Ltd. (Optimet) introduces DS 6000 –Dental Scanner and Digital System

March 2013, Optical Metrology Ltd. (Optimet), provider of high precision Dental CAD/CAM Scanners and non- contact 3-D measurement solutions for high precision industrial applications, is pleased to announce the launch of its new **DS 6000** desktop dental scanner. Optimet's newest technological breakthrough in 3D scanning and applications technology.

Optimet's state-of-the-art DS 6000 is a new generation Dental Scanner & Digital System. This fully automated scanner has the ability to scan all types of dental work such as bridges and implant bars, ranging from a single unit to full-arch restorations to the highest accuracy available. The DS 6000's easy and fast workflow is a fully integrated powerful Dental CAD/CAM solution. The DS 6000 software package includes our robust scanning software and sophisticated exocad dental CAD.

Optimet continues its valued and strategic partnership with Nobel Biocare and will continue to provide improvements and state of the art solutions for today's challenging market demands.
